

Middleware Requisition Volume/R&A approach : MW transaction volume will be monitored for anomalies. Volume analysis will be based on volume analysis study (www.army.mil/ssf/it/automation/aar_trans_vol.doc) and actual data files from the MW document history files. During the next year, a baseline will be established and standards of performance will be set. Also, a volume analysis will be conducted on SARSS-1 to the Gateway and results posted to the IT page of the SSF web site when completed.

Standard/Goal: There is no standard for this performance measure.

Proponent: DALO-SSF
